PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience building backend and full-stack applications using ASP.NET Core, C#, SQL Server, PostgreSQL, and React. Experienced in developing RESTful APIs, fixing production issues, working with stored procedures, and supporting business systems in HRMS and POS System. Comfortable working with both backend and frontend teams, and interested in building reliable, maintainable software for real users.

EXPERIENCE

QHRM

Yangon, (Remote)

Software Engineer

May 2025 - Present

- Developed and maintained backend features for an HRMS platform using ASP.NET Core, C#, Dapper, SQL Server, and Stored Procedures.
- Investigated and resolved production and QA issues across HRMS modules, including attendance, leave, payroll, reports, and mobile API features.
- Debugged legacy code and complex stored procedures to identify root causes of incorrect business data and system behavior.
- Improved existing features based on client feedback, QA findings, and release requirements.
- Collaborated with 3 backend developers and 6 mobile developers to support feature delivery, bug fixing, and release cycles under tight timelines.

KBZ Bank

Yangon, (Onsite)

Full Stack Software Engineer

Feb 2024 - May 2025

- Contributed to the development of an internal HRMS platform using ASP.NET Core, C#, React.js, TypeScript, and relational databases.
- Designed and developed RESTful APIs using ASP.NET Core with Clean Architecture principles to improve maintainability, separation of concerns, and long-term scalability.
- Worked on a microservice-based backend system using AWS ECS, AWS Fargate, and AWS SQS to support scalable service communication and background data processing.
- Designed and maintained relational database schemas to support HRMS business workflows and ensure reliable data handling across services.
- Built frontend features using React.js and TypeScript and integrated them with backend APIs to deliver end-to-end HRMS functionality.
- Collaborated with a team of 7 engineers in an Agile environment to deliver features, fix issues, and improve system functionality.
- Participated in internal AWS training and contributed to an AI-powered RAG application using AWS Bedrock.

InnoLogic

Yangon, (Onsite)

Software Developer

Jul 2019 - Feb 2020

- Developed responsive landing pages for clients using ASP.NET Web Forms, Bootstrap, HTML, CSS, and JavaScript.
- Built backend functionality using ASP.NET Web Forms, SQL Server, and Stored Procedures.
- Deployed web applications to IIS and supported production release activities.
- Performed software testing for internal products to identify bugs, verify functionality, and support quality assurance before release.

- Supported client-site testing by checking product behavior, reporting issues, and helping ensure the software met client requirements.

TECHNICAL PROJECTS

GoProd Multi-Tenant SaaS API — In Progress | ASP.NET Core, PostgreSQL, RBAC, Railway, Docker | [GitHub](#)

- Building a backend-focused SaaS API using ASP.NET Core, PostgreSQL, and Clean Architecture principles.
- Implemented project structure with separate API, Application, Domain, and Infrastructure layers to improve maintainability and separation of concerns.
- Developed authentication and authorization features using JWT, refresh tokens, tenant-aware access control, and role-based permissions.
- Added Docker support and deployed the API to Railway with CI/CD for automated deployment from GitHub.
- Integrated structured logging with Serilog and Seq to improve debugging, monitoring, and request tracing.
- Continuing to develop business modules for gym SaaS workflows, including tenant management, equipment, exercise, and user access features.

Self-Hosted VPN Management System | Marzban, Xray, Linux, Docker, Nginx, Cloudflare

- Configured and managed a self-hosted Marzban VPN management dashboard with multiple server nodes.
- Set up multi-node server configuration to manage VPN access across different servers from a centralized dashboard.
- Configured domain/subdomain routing, SSL, server access, and basic operational monitoring for the VPN infrastructure.
- Managed user subscriptions, access settings, and device testing across Android, Windows, macOS, and iOS clients.
- Gained hands-on experience with Linux server administration, Docker-based deployment, infrastructure troubleshooting, and self-hosted service maintenance.

EDUCATION

University Of People - Bachelor of Science In Computer Science

Oct 2027

Myanmar Skill Technology University - ITPEC Program

Oct 2023

SKILLS

Languages: C#, Java, JavaScript, TypeScript, SQL, HTML, CSS

Framework: .Net, .Net Core, NestJS, Tailwind

Libraries: Entity Framework Core, AutoMapper, Serilog, HangFire, xUnit, Moq, Dapper

Databases: MSSQL, MySQL, PostgreSQL, MongoDB, DynamoDb

Tools: AWS, Git, Docker, CLI, Claude Code, Codex

CERTIFICATES

IT Professionals Examination Council Certified Fundamental Information Technology Engineer Exam
